Currently designing full-time for The University of Utah

Started October 2015

Conduct and analyze usability tests as part of a UX/UI development process to determine relevant effective solutions for website structural and visual redesigns.

Lead redesign projects by delegating tasks to engineers and designers while mentoring student interns

Spearhead new fee-based service structure by actively consulting with clients and negotiating successful project bids to compete with direct and third-party competitors.

Use HTML5, CSS3, Javascript and the Adobe Suite to redesign and enhance websites.

Assist 400+ editors in the maintenance of 150+ sites campus-wide using a content management system.

Meet with editors to develop a content strategy and the best way to implement updated content, design, and layout.
